Publication Information: *Spectrochimica, Part A*, (ISSN 1386-1425). For 1998 volume 54 is scheduled for publication. Subscription prices are available upon request form the Publisher. Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by surface mail except to the following countries where Air delivery via SAL mail is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, PR China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For all other countries airmail rates are available upon request. Claims for missing issues should be made within six months of our publication (mailing) date.

Orders, claims, and product enquiries: please contact the Customer Support Department at the Regional Sales Office nearest you:
New York: Elsevier Science, P.O. Box 945, New York, NY 10159-0945, USA; Tel. (+1)212-633-3730, [Toll free number for North American customers: 1-888-4ES-INFO (437-4636)], Fax (+1)212-633-3680, E-mail usinfo-f@elsevier.com.
Amsterdam: Elsevier Science, P.O. Box 211, 1000 AE Amsterdam, The Netherlands; Tel. (+31)20-4853757, Fax (+31)20-4853432, E-mail nlinfo-f@elsevier.nl.
Tokyo: Elsevier Science, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan; Tel. (+81)3-5561-5033, Fax (+81)3-5561-5047, E-mail info@elsevier.co.jp
Singapore: Elsevier Science, No. 1 Temasek Avenue, #17-01 Millenia Tower, Singapore 039192; Tel. (+65)434-3727, Fax (+65)337-2230, E-mail asianfo@elsevier.com.sg.

Enquiries concerning manuscripts and proofs: questions arising after acceptance of the manuscript, especially those relating to proofs, should be directed to Elsevier Science Ireland Ltd., Bay 15, Shannon Industrial Estate, Shannon, Co. Clare, Ireland; Tel. +353 (61) 471944; Fax: +353 (61) 472144

Advertising information: Advertising orders and enquiries may be sent to: **International:** Elsevier Science, Advertising Department, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK; Tel: +44 (0) 1865 843565; Fax: +44 (0) 1865 843976. **USA & Canada**: Tino DeCarlo, Advertising Sales Director, Elsevier Science Inc., 655 Avenue of the Americas, New York, NY 10010-5107, USA. Tel: (+212) 633 3815; Fax: (+212) 633 3820; email: t.decarlo@elsevier.com. **Japan**: Elsevier Science Japan, Marketing Services, 1-9-15 Higashi-Azabu, Minato-ku, Tokyo 106, Japan: Tel: (+81) 3 5561 5033; Fax: (+81) 3 5561 5047.

US mailing notice: *Spectrochimica, Part A* (ISSN 1386-1425) is published monthly plus additional issues in July and November by Elsevier Science, (Molenwerf 1, Postbus 211, 1000AE Amsterdam). Annual subscription price in the USA is US $2371.00 (valid in North, Central and South America), including air speed delivery. Application to mail at second class postage rate is pending at Jamaica, NY 11431.

USA POSTMASTER: Send address changes to Spectrochimica Acta, Part A, Publications Expediting. Inc., 200 Meacham Avenue, Elmont, NY 11003. **AIRFREIGHT AND MAILING** in the USA by Publication Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003.

SPECTROCHIMICA ACTA
PART A

Contents of Volume 53, 1997

No. 1

Special Issue: **Applications of Fourier Transform Raman Spectroscopy—VI**
Guest Editor: Patrick Hendra

	i	Publishers Note
	vii	Editorial
Instrumental		
T. Özpozan, B. Schrader and S. Keller	1	Monitoring of the polymerization of vinylacetate by near IR FT Raman spectroscopy
J. Haigh, A. Brookes, P.J. Hendra, A. Strawn, C. Nicholas and M. Purbrick	9	The design and construction of a cell for the in situ monitoring of copolymerisation reactions using FT-Raman spectroscopy
G. Dent and F. Farrell	21	NIR FT Raman examination of phthalocyanines at 1064 nm
D.P. Schweinsberg and Y.D. West	25	Quantitative FT Raman analysis of two component systems
Y.D. West	35	Research report on measuring the Raman spectra of temperature-sensitive solid samples
Inorganics		
H.G.M. Edwards, E. Hickmott and M.A. Hughes	43	Vibrational spectroscopic studies of potential amidic extractants for lanthanides and actinides in nuclear waste treatment
V. Vacque, B. Sombret, J.P. Huvenne, P. Legrand and S. Suc	55	Characterisation of the O–O peroxide bond by vibrational spectroscopy
A.N. Shchegolikhin and O.L. Lazareva	67	NIR-FT Raman image of solid-state polymerization of PTS diacetylene
Biological		
W. Akhtar and H.G.M. Edwards	81	Fourier-transform Raman spectroscopy of mammalian and avian keratotic biopolymers
J. Ryttersgaard, B.D. Larsen, A. Holm, D.H. Christensen and O.F. Nielsen	91	Monitoring of a solid phase peptide synthesis by NIR-FT-Raman spectroscopy

H.G.M. Edwards, N.C. Russell and M.R.D. Seaward	99	Calcium oxalate in lichen biodeterioration studied using FT-Raman spectroscopy
A. Beljebbar, G.D. Sockalingum, H. Morjani, J.F. Angiboust and M. Manfait	103	NIR and visible investigation of some potential SERS-active substrates for studying antitumour agent all-*trans* retinoic acid
Polymers		
B.H. Stuart	107	A Fourier transform Raman spectroscopy study of the crystallisation behaviour of a poly(ether ether ketone)/poly(ether sulphone) blend
B.H. Stuart	111	The application of Fourier transform Raman spectroscopy to polymer tribology
S.F. Parker and H. Herman	119	Vibrational spectra of perdeuteropolyethylene
SERS & surfaces		
A. Beljebbar, G.D. Sockalingum, H. Morjani, J.F. Angiboust and M. Manfait	123	NIR and visible investigation of some potential SERS-active substrates for studying antitumour agent all-*trans* retinoic acid

No. 2

MOLECULAR SPECTROSCOPY

I.R. Dunkin and C.J. Shields	129	The scope and limitations of cyanide groups as direction labels for the conformational analysis of matrix-isolated molecules of low symmetry: Part 1: Light-induced infrared dichroism of matrix-isolated 2- and 4-cyanophenyl azides
I.R. Dunkin and C.J. Shields	141	The scope and limitations of cyanide groups as direction labels for the conformational analysis of matrix-isolated molecules of low symmetry: Part 2: 3-Cyanophenyl azide and two conformationally restrained derivatives
P. Kumar, R.K. Garg, O. Parkash, R.S. Ram and Z.H. Zaidi	151	Photoacoustic spectroscopic studies of polycyclic aromatic hydrocarbons: naphthalene molecule
S.-F. Yang, X.-g. Wang and Q.-S. Zhu	157	High resolution vibration–rotation spectrum of arsine $v = 2$ stretching overtone
S. Pandey, K.A. Fletcher, J.R. Powell, M.E.R. McHale, A.-S. Kauppila, W.E. Acree, Jr., J.C. Fetzer, W. Dai and R.G. Harvey	165	Spectrochemical investigations of fluorescence quenching agents : Part 5. Effect of surfactants on the ability of nitromethane to selectively quench fluorescence emission of alternant PAHs

J. DeSaja-Gonzalez, R. Aroca, Y. Nagao and J.A. DeSaja	173	Surface-enhanced fluorescence and SERRS spectra of *N* - octadecyl - 3,4:9,10 - perylenetetracarboxylic monoanhydride on silver island films
G.E. Tobón-Zapata, S.B. Etcheverry and E.J. Barran	183	Vibrational spectrum of Sanocrysin
L.E. Fernández, A.B. Altabef, A.C. Fantoni and E.L. Varetti	189	Infrared and Raman spectra and ab initio calculations for normal and deuterated trifluoromethanesulfonamide
P.E. Flecher, W.T. Welch, S. Albin and J.B. Cooper	199	Determination of octane numbers and Reid vapor pressure in commercial gasoline using dispersive fiber-optic raman spectroscopy
W.C. Emken, K.W. Hedberg and J.C. Decius	207	An investigation of the low temperature infrared spectrum of solid films of thiazyl chloride, NSCl
K. Hassler, W. Köll and M. Ernst	213	Synthese, Kernresonanz-, Infrarot- und Raman Spektren, Normalkoordinatenanalysen und ab initio Berechnungen von 1,1-Diioddisilan und 1,1-Diioddisilan-d_4
J. Roy, S. Bhattacharya, S. Mondal and S. Ghosh	225	Room temperature ($n\pi^*$) phosphorescence of indanetrione (anhydrous ninhydrine) in phthalic anhydride matrix
H. Bettermann, I. Dasting and U. Wolff	233	Kinetic investigations of the laser-induced photolysis of sodium rhodizonate in aqueous solutions
J.R. Letelier and C.A. Utreras-Díaz	247	A numerical molecular potential for the umbrella inversion in ammonia
R.M. Krishna, V.P. Seth, S.K. Gupta, D. Prakash, I. Chand and J. Lakshmana Rao	253	EPR of Mn^{2+}-ion-doped single crystals of $Mg[C_4H_3O_4]_2 \cdot 6H_2O$
X. Zhou and R. Liu	259	Density functional theory study of vibrational spectra, 6: assignment of fundamental vibrational frequencies of benzene isomers: Dewar benzene, benzvalene, trimethylenecyclopropane, prismane, and 3,4-dimethylenecyclobutene
Short Note		
V. Tralić-Kulenović and L. Fišer-Jakić	271	Solvent and substituent effect on the absorption and fluorescence properties of substituted 2-phenylbenzothiazoles and their vinylogues

BIOMOLECULAR SPECTROSCOPY

Y. Hu, J.-P. Zhang, T. Mizoguchi, Y. Koyama, Y. Yamano and M. Ito	277	How the terminal methyl group affects the S_0, S_1 and T_1 electronic structures of a conjugated aldehyde chain: A comparison between all-*trans*-β-apo-12′-carotenal and its analogue by NMR and Raman spectroscopy
A.J. Berger, I. Itzkan and M.S. Feld	287	Feasibility of measuring blood glucose concentration by near-infrared Raman spectroscopy
Letter		
L. Šikurová and B. Čunderlíková	293	pH dependence of merocyanine 540 absorption and fluorescence spectra

No. 3

MOLECULAR SPECTROSCOPY

B.C. Bricknell, T.A. Ford and T.M. Letcher	299	Spectroscopic and thermodynamic properties of hydrogen bonded water molecules in binary liquid mixtures
M.S. Antonious	317	Solvent polarity indicators: Flexible styrylpyridinium and quinolinium fluorescence probes for medium free-volume
S.E. Jayaraj and V. Ramakrishnan	325	Surface enhanced Raman spectrum of 1-acetylaminoanthraquinone in silver sol
O.N. Ulenikov, S.N. Yurchenko and R.N. Tolchenov	329	On the study of XY_2 ($m_y \ll m_x$) plane molecules
A.A. Ahmed, M. Julliard, F. Chanon, M. Chanon, F. Gracian and G. Pfister-Guillouzo	335	Photoelectron spectroscopy of quinoline derivatives. Correlation of experimental ionization potentials with calculated molecular energies
M. Harcharras, A. Ennaciri, A. Rulmont and B. Gilbert	345	Vibrational spectra and structures of double diphosphates $M_2CdP_2O_7$ (M = Li, Na, K, Rb, Cs)
R. Singhai, S.N. Limaye and M.C. Saxena	353	Relationship between the oscillator strength values and average band energies of the electronic transitions of some lanthanoid (III) ions doped in different environments and their ground state *J* designations
R.G. Guy, R. Lau, A.U. Rahman and F.J. Swinbourne	361	Pseudohalogen chemistry: Part 14. Quantitative treatment of the *ortho* and other substituent effects in the NMR and IR spectra of 2- and 2,4-substituted thiocyanatobenzenes

Short Notes

H.A. Dessouki, E.M. Mabrouk and S.A. Shama 375 Electronic, infrared and proton magnetic resonance spectral studies on some azo and azo-azomethine derivatives

L.K. Dyall, G. L'abbé and W. Dehaen 377 N–H stretching frequencies in primary amino groups attached to five-membered heterocyclic rings

BIOMOLECULAR SPECTROSCOPY

P. Kok, J. Köhler, E.J.J. Groenen, R. Gebhard, I. van der Hoef, J. Lugtenburg, R. Farhoosh and H.A. Frank 381 Resonance Raman spectroscopy of ^{2}H-labelled spheroidenes in petroleum ether and in the *Rhodobacter sphaeroides* reaction centre

M. Aida, M. Kaneko, M. Dupuis, T. Ueda, K. Ushizawa, G. Ito, A. Kumakura and M. Tsuboi 393 Vibrational modes in thymine molecule from an ab initio MO calculation

M. Tsuboi, A. Kumakura, M. Aida, M. Kaneko, M. Dupuis, K. Ushizawa and T. Ueda 409 Raman scattering tensors in thymine molecule from an ab initio MO calculation

J. Pedrós, I. Porcar, C.M. Gómez, A. Campos and C. Abad 421 Interaction of quinine with negatively charged lipid vesicles studied by fluorescence spectroscopy: Influence of the pH

V.S. Oganesyan and Y.A. Sharonov 433 A 4-term energy level scheme for the high-spin ferrous hemoproteins: Evidence for the $^{5}E_{\eta}$ and $^{5}B_{2}$ terms as the ground multiplets in hemoproteins with a histidine and a cysteine protein-derived heme ligand, respectively

Letters

A. Hickel, G. Gradnig, M. Schall, K. Zangger and H. Griengl 451 Determination of enantiomeric purity of mandelonitrile with derivatized cyclodextrins in water

J. Guharay, R. Chaudhuri, A. Chakrabarti and P.K. Sengupta 457 Excited state proton transfer fluorescence of 3-hydroxyflavone in model membranes

J. Peszke, B. Mianowska and W. Śliwa	2565	CI AM1 study of the electronic structure of isomeric formyl benzonaphthyridines
E.E. Lawson, H.G.M. Edwards and A.F. Johnson	2571	FT-Raman spectroscopy of the reaction of polybutadiene with mercapto-thiadiazoles
B.S. Panigrahi, S. Peter and K.S. Viswanathan	2579	Cofluorescence of Eu^{3+} in complexes of aromatic carboxylic acids
K. Datta, A.K. Mukherjee, M. Banerjee and B.K. Seal	2587	Studies on labile chargetransfer complexes between *o*-chloranil and a series of phenols
W.B. Tzeng, K. Narayanan, C.Y. Hsieh and C.C. Tung	2595	A study of the excited state structure and vibrations of hydroquinone by ab initio calculations and resonant two-photon ionization spectroscopy
K.V. Narasimhulu and J.L. Rao	2605	A single crystal EPR study of VO^{2+} ions doped in $Cs_2Co(SO_4)_2.6H_2O$ Tutton salt
K.B. Andersen and J. Spanget-Larsen	2615	Electronic transitions and intramolecular hydrogen bonding in anthralin. UV-VIS linear dichroism spectroscopy and quantum chemical calculations
J.A. Anderson, S.E. Falconer and M. Galán-Fereres	2627	Ni/sepiolite hydrogenation catalysts: Part 1: Precursor–support interaction and nature of exposed metal surfaces
	2641	Book Reviews

BIOMOLECULAR SPECTROSCOPY

T. Kupka	2649	β-Lactam antibiotics. Spectroscopy and molecular orbital (MO) calculations: Part I: IR studies of complexation in penicillin-transition metal ion systems and semi-empirical PM3 calculations on simple model compounds

K.R. Naqvi, T.B. Melø, B.B. Raju, T. Jávorfi, I. Simidjiev and G. Garab	2659	Quenching of chlorophyll *a* singlets and triplets by carotenoids in light-harvesting complex of photosystem II: comparison of aggregates with trimers
M. Monshi, K. Al-Farhan, S. Al-Resayes, A. Ghaith and A.A. Hasanein	2669	Excited states dipole moments and polarizabilities of uracil and cytosine 5-halo derivatives
M. Conceição, D.A. Mateus, A.M. da Silva and H.D. Burrows	2679	UV-visible absorption spectra and luminescence of the pesticide fenarimol
H.G.M. Edwards and M.J.P. Falk	2685	Fourier-transform Raman spectroscopic study of unsaturated and saturated waxes
K. Tonan and S.-i. Ikawa	2695	High pressure FTIR study of intramolecular hydrogen bonding and conformation of a small peptide in solution
W.J. Jin, Y.S. Wei, C.S. Liu, G.L. Shen and R.Q. Yu	2701	Fluorescence quenching of ethidium ion by porphyrin cations and quaternary ammonium surfactants in the presence of DNA

SPECTROCHIMICA ACTA

PART A: MOLECULAR AND BIOMOLECULAR SPECTROSCOPY

NOTES FOR CONTRIBUTORS

General

The journal publishes full length *Papers*, *Letters*, *Short Notes* and *Review Articles*. All contributions should have clear scientific value and report new data, procedures, equipment, or new theoretical considerations, as noted in the Aims and Scope for either "Molecular Spectroscopy" or "Biomolecular Spectroscopy".

Papers should be complete, authoritative, and scientifically sound accounts of work are presented clearly and concisely.

Letters are meant for publication of important new results in concise form. *Letters* should not exceed the equivalent of 5000 words including figures and tables. Special attention will be given to ensure rapid publication of contributions accepted as *Letters*.

Short Notes are a complete and concise account of a restricted area of work.

Review Articles are commissioned by the Editors on the advice of the Editorial Advisory Board. Authors wishing to submit a review article should contact an Editor or a member of the Board.

The submission of a contribution for publication in *Spectrochimica Acta Part A* is held to imply that it has not previously been published in any language, that it is not under consideration for publication elsewhere, and that if accepted for publication it will not be published elsewhere without the written approval of the Editors and consent of the Publisher.

Submission of Contributions

Authors should submit their contribution to the appropriate section (*Molecular Spectroscopy* or *Biomolecular Spectroscopy*) as follows:

Molecular Spectroscopy

Typescripts should be submitted to one of the Editors: Professor Sidney Kettle or Professor Jeffrey Steinfeld.

Professor Sidney Kettle, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ, UK
Fax: +44 1263 731721

Professor Jeffrey Steinfeld, Department of Chemistry, Massachusetts Institute of Technology,
Cambridge, MA 02139, USA
Fax: +1 617 253 7030
e-mail: jisteinf@mit.edu

Biomolecular Spectroscopy

Typescripts should be submitted to one of the Editors: Professor Arnold Hoff or Dr. Jack Fajer, or directly to an expert member of the Editorial Advisory Board for *Biomolecular Spectroscopy*. Final responsibility for acceptance or rejection always rests with the Editors.

Professor Arnold J. Hoff, Huygens Laboratory, Leiden University, Niels Bohrweg 2, PO Box 9504, 2300 RA Leiden, The Netherlands
Fax: +31 71 275955/5700
e-mail: HOFF@RULHL1.LEIDENUNIV.NL

Dr. Jack Fajer, Department of Applied Science, Brookhaven National Laboratory, Upton, NY 11973, USA
Fax: +1 516 344 3137
e-mail: fajerj@bnl.gov

The full addresses of Editorial Advisory Board members are given in the first issue of each volume of the journal.

Contributions may be written in English, French or German, but English is the preferred language. For all papers an abstract in English must be provided.

All contributions must be written in English.

All authors are requested to include a note of their telephone number, fax number and e-mail address when submitting their typescript.

Format of Contributions

Authors are requested to submit an original *double-spaced*, manuscript along with two copies of the complete text and the figures.

Double spacing should be used not only in the main body of the text but also in the abstract, the table headings, the figure captions, footnotes, and list of references. The manuscript must be organized in conformity with the manuscript requirements of the journal (see below). Close agreement with these manuscript requirements considerably speeds up publication.

Manuscripts should be typed on one side of the page only, and the text should have wide margins. Authors should also submit a copy of any paper included in the references which is not yet published, e.g. "in press" or "submitted for publication". Original drawings and photographs are in general not returned to authors unless specifically requested.

Electronic manucripts

Electronic manuscripts have the advantage that there is no need for the rekeying of text, thereby avoiding the possibility of introducing errors and resulting in reliable and fast delivery of proofs. For the initial submission of manuscripts for consideration, hardcopies are sufficient. For the processing of accepted papers, electronic versions are preferred. After final acceptance, your disk plus two final and exactly matching printed versions should be submitted together. Double density (DD) or high density (HD) diskettes (3.5 or 5.25 inch) are acceptable. It is important that the file saved is in the native format of the wordprocessor program used. Label the disk with the name of the computer and wordprocessing package used, your name, and the name of the file on the disk. Further information may be obtained from the Publisher.

Illustrations

The original line drawings or photographs for figures must be supplied with one of the copies of the typescript. Each illustration should be identified on the reverse side (or, in the case of line drawings, on the lower front side) by its number, the name of the author, and the title of the paper.

Captions for figures should be typed on a separate sheet.

Line drawings should always be carefully prepared at about twice the final size, on plain white drawing paper, and suitable for direct reproduction. Laser printer output at 300 dots per inch for a two-to-one reduction on good quality paper is acceptable. Authors should take particular care to ensure that lettering on a figure will remain clearly legible after reduction.

Photographs are only acceptable if they have good contrast and intensity. Sharp, glossy black and white prints are required. Three sets of original photographs should be sumbitted. Photocopies of printed photographs are unacceptable.

Colour printing of illustrations is generally only available when processing and printing are paid for by the author.

Tables

Each *Table* should be supplied on a separate sheet and should include a brief, self-explanatory title. Tables should never be included in the text.

Tables should be constructed as to be intelligible without reference to the text, every table and column being provided with a heading. Units of measurement must always be clearly indicated. Unless it is essential to the argument, tables should not list the results of individual experiments, but should summarize results by an accepted method of expression (e.g. standard deviation). The same information should not be produced in both tables and figures.

Units and Nomenclature

SI units are required.

All nomenclature and notation should conform as closely as possible to the rules established by IUPAC and IUPAP, as summarized in the following publications: N. Sheppard, H.A. Willis and J.C. Rigg, Spectrochimica Acta Part A, 43 (1987) 1; E.R. Cohen and P. Giacomo, Physica, 146A (1987) 1–68; I. Mills et al., Quantities, Units and Symbols in Physical Chemistry, Blackwell, Oxford (1988).

References

References should be indicated in the text by consecutive numbers in square brackets; the full references should be listed at the end of the paper in the following form:

[1] C.J. Pedersen, J. Am. Chem. Soc., 89 (1967) 7017.
[2] J.D. Lamb, R.M. Izatt, J.J. Christensen and D.J. Eatough, in Coordination Chemistry of Macrocyclic Compounds, G.A. Melson (Ed.), Chap. 1, Plenum Press, New York, 1979.
[3] R.M. Izatt, J.S. Bradshaw, S.A. Nielsen, J.D. Lamb, J.J. Christensen and D. Sen, Chem. Rev., 85 (1985) 271.
[4] R.D. Amos, Advances in Chemical Physics, I. Prigogine and S.A. Rice (Eds.), Vol. 67, p. 99. Wiley, New York, 1987.

Journal-name abbreviations should conform to those adopted by The Chemical Abstracts Service (Bibliographic Guide for Editors and Authors, The American Chemical Society, Washington, DC, 1974).

Proofs

A set of page proofs will be despatched directly from the typesetters to the first-named author, unless otherwise requested. Corrections at this stage should be restricted to the correction of typesetting errors. Other extensive alterations will be charged to the author or his institution. For Letters, the author will generally not receive a proof unless specifically requested.

Page charge and reprints

There is no page charge. Fifty reprints of each article will be provided free of charge to the principal author. Additional reprints can be ordered at prices shown on the off-print order form that accompanies the proofs.

Copyright and permissions

Upon acceptance of an article by the journal, the authors will be asked to transfer the copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.
If excerpts from copyrighted works are included, the author must obtain written permission from the copyright holder, and must credit the source in the article.

Deposition Of Supplementary Data

From time to time, manuscripts are received which contain extensive tabular data or other material which should be available to workers in the field but which is not immediately essential for the discussion in the text. Whilst such material is clearly of archival interest, cost constraints on production and distribution of the Journal make it impractical to publish it. For this reason, an arrangement has been entered into with the British Library Document Supply Centre for storage of such material as a supplementary document. Contributors are invited to avail themselves of the opportunity to submit material for deposition in this way. Examples of data suitable for handling in this way include spectral line listings in high-resolution spectroscopy, symmetry coordinates and F and G matrix elements in normal-coordinate analyses, thermodynamic functions calculated from spectroscopic data and, sometimes, spectra themselves. On those occasions on which it is appropriate to publish the results of crystallographic structure determinations, it would be appropriate to deposit tables of observed and calculated structure factors, least squares planes, some atomic coordinates and the like. On occasions, referees may suggest that some of the data contained in a manuscript should form the basis of a deposited document.

Authors wishing to make use of this scheme should include a reference in their manuscript to the deposited material (usually

this is placed immediately before the list of references). The form of the statement should follow the general pattern indicated below, in which the first ... should be filled by an indication of the nature of the material contained in the deposited document:-

"... have been deposited with the British Library at Boston Spa, Wetherby, West Yorks, U.K. as Supplementary Publication No. SUP .... (.. pages). Persons wishing to obtain copies of deposited material should contact Service Enquiries, British Lending Library, Boston Spa, Wetherby, West Yorks, LS23 7BQ, U.K. citing the SUP number. Tel (+44/0) 1937 546 060; fax (−44/0) 1937 546 333; email dsc-customer-services@bl.uk"

The SUP number will be added by the Editorial Office; the number of pages is one greater than the number to be deposited, the additional sheet being a cover sheet which contains the following information (to be added, where necessary, in the Editorial Office):-

Spectrochimica Acta A, (year of publication), volume number.
SUP ....
A brief description of the material deposited.
